Project Information

Project Number _____ Approval _____

Features

- Audible and Visual Alarms
- Meter Display of Gas Concentration
- Solid State Electronics
- Operates on 110 Volts
- Easy installation and use
- Remote alarm contacts
- 3 year sensor life and 1 year warranty

Specifications

The Carbon Monoxide Monitor utilizes a metallic oxide semiconductor (MOS) sensor characterized for carbon monoxide to detect hazardous levels in compressed air. Unit activates at both 10 ppm and 20 ppm alarm points. Calibration and operation is optimized by means of a humidification assembly and hydrocarbon filter in the sample line.
